Chapter 1

INTRODUCTION TO BUSINESS ANALYSIS

1.7 Business Analysis Techniques

"Business analysis is the practice of enabling change in an enterprise by defining needs and recommending solutions that deliver value to stakeholders. It is a disciplined approach for introducing and managing change to organizations, whether they are for-profit businesses, governments, or non-profit organizations. Business analysis is used to identify and articulate the need for change in how organizations work and to facilitate that change."

(BABOK® Guide)

Chapter 1: INTRODUCTION TO BUSINESS ANALYSIS

1.1 Business Analysis

- According to the International Institute of Business Analysis (IIBA): **Business Analysis (BA) is the practice of enabling change within an organization by identifying business needs and recommending solutions that deliver value to stakeholders.**
- Business Analysis:
 - Enables organizational change to solve business problems, realize new ideas, and capitalize on opportunities.
 - Helps identify and recommend solutions that create value for stakeholders.
 - Achieves this by clearly defining business needs, understanding the reasons for change, and designing and describing appropriate solutions.

• Types of Business Analysis

-
- | Category | Percentage |
|-------------|------------|
| IT BA | 33% |
| Hybrid | 33% |
| Non - IT BA | 33% |

Chapter 1: INTRODUCTION TO BUSINESS ANALYSIS

1.1 Business Analysis
